Software Engineer I

Software Development Lifecycle (SDLC+) • *Personal Insurance*

November 2024–
April 2026

Independently delivered enterprise-wide GenAI code reviewer that reduces defects by 25%.

- Saved over \$6M in labor costs per year by shortening review cycles by over 15% on average.
- Engineered lightweight context-gathering system based on derived ontological connections.
- Wrote and presented documentation and demos for audiences from users to C-suite leaders.
- Developed and shipped both production deployment and IaC kit for user customization.

Prototyped a website graphing tool to derive and visualize user-driven end-to-end tests.

- Revolutionized QA paradigms by replacing static E2E scripts with robust algorithmic induction.
- Innovated lightweight yet robust naïve crawler to avoid model costs while building coverage.
- Projected annual QE harvest of 30% through deterministic test creation and ad-hoc execution.

Published detailed library and documentation to expedite Model Context Protocol adoption.

AWS BEDROCK, CLAUDE, PYTHON, TERRAFORM, DYNATRACE, TYPESCRIPT, MCP, JIRA, AMAZON Q, MICROSOFT COPILOT

Software Engineer, Technology Leadership Development Program

Self-Service • *Personal Insurance*

September 2023–
October 2024

Extended and refined a mission-critical multiplatform billing portal serving millions of users.

Supervised and co-designed a small team's implementation of an xAPI contract refactor.

REACT, NODE, EXPRESS, REACT NATIVE, ANDROID, IOS, JEST, AWS LAMBDA, AWS CLOUDWATCH, RALLY

Software Intern, Technology Leadership Development Program

Artificial Intelligence & Analytics • *Business Insurance*

June 2022–
August 2022

Developed and deployed an NLP web app leveraging BERT to visualize survey sentiments.

REACT, NODE, EXPRESS, MONGODB, MONGOOSE, PYTHON, FLASK, AWS LAMBDA, AWS S3, HUGGINGFACE

Information Insights • *Business Insurance*

Translated business needs into new standards for Salesforce data models and visualizations.

SALESFORCE, TRAILHEAD, DASHBOARDS

June 2021–
August 2021

Technology Intern

Innovation Technology • *Digital Enablement*

June 2020–
August 2020

Contributed to development and unit testing of a company-wide MERN-stack event hub.

Collaborated on and presented to vendors a cloud architecture for an event-based IoT POC.

REACT, NODE, EXPRESS, MONGODB, TERRAFORM, AWS CLOUDWATCH, AWS S3
