Software Engineer I

Software Development Lifecycle (SDLC+) • *Personal Insurance*

Nov. 2024 –
Present

Operated with high autonomy to identify essential pivot points within undefined problem spaces. Investigated development flows across teams to uncover shared frictions and target POC efforts. Owned end-to-end creation of a proprietary, company-standard GenAI code reviewer.

- Effected multimillion-dollar savings through defect prevention and a ~60% cut in review cycle time.
- Built a light natural-language context layer gathering codebase inferences from targeted excerpts.
- Delivered both production deployment and a separate IaC kit for team-specific workflow alignment.
- Educated audiences from engineers to C-suite on review bottlenecks and impact on development.
- Wrote comprehensive documentation on design and usage for stakeholders across technical levels.

Prototyped a website-graphing system surfacing implicit functional requirements as flow maps.

- Reimagined functionality documentation as visual topology of true-state page and action sequences.
- Projected significant QE uplift by replacing static scripts with inductive path mapping and execution.
- Built a minimal-cost crawler maximizing flow coverage while avoiding model invocation overhead.

Published an early MCP library articulating core structures to facilitate easy exploration.

Delivered lectures and workshops challenging paradigms in unit testing and agentic architecture.

AWS BEDROCK, CLAUDE, PYTHON, TERRAFORM, DYNATRACE, TYPESCRIPT, MCP, JIRA, AMAZON Q, MICROSOFT COPILOT

Software Engineer, Technology Leadership Development Program

Self-Service • *Personal Insurance*

Sept. 2023 –
Oct. 2024

Improved quality of a critical multiplatform billing portal through refactors and code reviews.

Led and co-architected an xAPI contract rework consolidating and clarifying business logic.

REACT, NODE, EXPRESS, REACT NATIVE, ANDROID, IOS, JEST, AWS LAMBDA, AWS CLOUDWATCH, RALLY

Software Intern, Technology Leadership Development Program

Artificial Intelligence & Analytics • *Business Insurance*

June 2022 –
Aug. 2022

Developed a BERT-based NLP web app visualizing sentiment patterns and user reasoning.

REACT, NODE, EXPRESS, MONGODB, MONGOOSE, PYTHON, FLASK, AWS LAMBDA, AWS S3, HUGGINGFACE

Information Insights • *Business Insurance*

Redesigned Salesforce schemas and dashboards by distilling stakeholder needs into data models.

June 2021 –
Aug. 2021

SALESFORCE, TRAILHEAD, DASHBOARDS

Technology Intern

Innovation Technology • *Digital Enablement*

June 2020 –
Aug. 2020

Collaborated on and presented a cloud-native IoT architecture to internal and vendor teams.

Implemented and unit-tested features for a high-traffic MERN event hub.

REACT, NODE, EXPRESS, MONGODB, TERRAFORM, AWS CLOUDWATCH, AWS S3

Education

Wellesley
College

B.A., Computer Science and Cognitive and Linguistic Sciences

May 2023

Cognitive Psychology Concentration • *Summa Cum Laude*

Certifications

AWS

Certified Cloud Practitioner

Dec. 2023
