Software Engineer II

Agentic Platforms • *Enterprise AI & Emerging Technology*

Jan. 2026 – Present

Redesigned the metadata model for an enterprise MCP registry to improve usability and integrity.

- Automated metadata generation to enforce naming and formatting standards.

Advised cross-org teams on agent orchestration and latency optimization.

Produced an interactive booth explaining agent reasoning to technical and business audiences.

Migrated the enterprise AgentCore template to Strands and designed multi-runtime support.

Prepared an AI evaluation platform for production deployment and validated data security.

Software Engineer I

Software Development Lifecycle (SDLC+) • *Personal Insurance*

Nov. 2024 – Jan. 2026

Operated autonomously to extract impactful opportunities from ambiguous problem spaces.

- Investigated development flows across teams to uncover shared frictions and target POC efforts.

Owned end-to-end creation of a proprietary, company-standard GenAI code reviewer.

- Effected an average ~90% cost savings for code review cycles and a ~40% duration reduction.
- Built a light natural-language context layer compiling codebase inferences from targeted excerpts.
- Delivered both production deployment and a separate IaC kit for team-specific workflow alignment.
- Educated audiences from engineers to C-suite on review bottlenecks and impact on development.
- Wrote comprehensive documentation on design and usage for stakeholders across technical levels.

Prototyped a website-graphing system surfacing implicit functional requirements as flow maps.

- Reimagined functionality documentation as visual topology of true-state page and action sequences.
- Projected significant QE uplift by replacing static scripts with inductive path mapping and execution.
- Built a minimal-cost crawler maximizing flow coverage while avoiding model invocation overhead.

Published an early MCP library articulating core structures to facilitate easy exploration.

Delivered lectures and workshops challenging paradigms in unit testing and agentic architecture.

AWS BEDROCK, CLAUDE, PYTHON, TERRAFORM, DYNATRACE, TYPESCRIPT, MCP, JIRA, AMAZON Q, MICROSOFT COPILOT

Software Engineer, Technology Leadership Development Program

Self-Service • *Personal Insurance*

Sept. 2023 – Oct. 2024

Improved quality of a critical multiplatform billing portal through refactors and code reviews.

Led and co-architected an xAPI contract rework consolidating and clarifying business logic.

REACT, NODE, EXPRESS, REACT NATIVE, ANDROID, IOS, JEST, AWS LAMBDA, AWS CLOUDWATCH, RALLY

Software Intern, Technology Leadership Development Program

Artificial Intelligence & Analytics • *Business Insurance*

June 2022 – Aug. 2022

Developed a BERT-based NLP web app visualizing sentiment patterns and user reasoning.

REACT, NODE, EXPRESS, MONGODB, MONGODB, PYTHON, FLASK, AWS LAMBDA, AWS S3, HUGGINGFACE

Information Insights • *Business Insurance*

Redesigned Salesforce schemas and dashboards by distilling stakeholder needs into data models.

June 2021 – Aug. 2021

SALESFORCE, TRAILHEAD, DASHBOARDS

Innovation Technology • *Digital Enablement*

Collaborated on and presented a cloud-native IoT architecture to internal and vendor teams.

June 2020 – Aug. 2020

REACT, NODE, EXPRESS, MONGODB, TERRAFORM, AWS CLOUDWATCH, AWS S3
